założenia

Zakładamy, że A jest macierzą symetryczną o rozmiarze n × n (A \in Matrices[{n , n} , Reals , Symmetric[{1 , 2}]]) oraz, że r1, p1,rk,pk,rkm,pkm są wektorami o rozmiarze n i rzeczywistych współrzędnych ((r1|p1) \in Vectors[n , Reals]).

pierwszy krok dowodu, sprawdzenie pojedynczego przypadku

```
\mathsf{r1}^\mathsf{T}\,\mathsf{r1} \quad \overset{\mathsf{można}\;\mathsf{rozpisa\acute{c}}}{\longleftrightarrow} \ \sum_{\mathsf{i}} \mathsf{r1}_{\mathsf{i}}\;\mathsf{r1}^{\mathsf{i}} \ \longleftrightarrow
            zwężenie współrzędnych 1 oraz 2 tensora r1⊗r1,
        którego wartość dla współrzędych k,
        l dana jest przez r1_k r1^l (TensorContract [r1 \otimes r1, \{\{1, 2\}\}])
        A \hspace{.1cm} p1 \hspace{.1cm} \stackrel{\text{można rozpisać}}{\longleftrightarrow} \hspace{.1cm} \sum\nolimits_k {A^{\dot{1}}}_k \hspace{.1cm} p1^k \hspace{.1cm} \longleftrightarrow \hspace{.1cm}
            zwężenie współrzędnych 2 oraz 3 tensora A⊗p1,
        którego wartość dla współrzędych l, m,
        n dana jest przez A^{l}_{m} p1^{n} (TensorContract [A \otimes p1, \{\{2, 3\}\}])
        p1^T A p1 \xrightarrow{\text{można rozpisać}} \sum_{i,k} p1_i A^i_k p1^k \leftrightarrow
            zwężenie współrzędnych 1, 2 oraz 3, 4 tensora p1⊗A⊗p1,
        którego wartość dla współrzędych l, m, n,
        o dana jest przez p1_1 A^m_n p1^\circ (TensorContract [p1 \otimes A \otimes p1, {{1, 2}, {3, 4}}])
        \alpha 1 = TensorContract[r1 \otimes r1, \{\{1, 2\}\}]/TensorContract[p1 \otimes A \otimes p1, \{\{1, 2\}, \{3, 4\}\}];
        r2 = r1 - \alpha 1 TensorContract [A\otimesp1, {{2, 3}}];
        \beta 1 = TensorContract [r2 \otimes r2 , {{1 , 2}}]/TensorContract [r1 \otimes r1 , {{1 , 2}}];
       p2 = r2 + \beta 1 p1;
        Zakładamy dodatkowo, że p1 = r1 i podmieniamy wszędzie r1 za p1 aby uprościć wyrażenia (/.{p1 -> r1}).
In[6]:= (*twierdzenie pomocnicze*)
       TensorContract [p1 \otimes A \otimes p1, \{\{1, 2\}, \{3, 4\}\}] =
               TensorContract [p1⊗A⊗r1 , {{1 , 2}, {3 , 4}}] /. {p1 \rightarrow r1} // TensorReduce // FullSimplify
Out[7]= True
```

indukcja
